

Science from Scientists Newsletter

Hello SfS Supporters,

It's been a busy spring! Over the last few months, we've expanded into 5 additional schools across Massachusetts, California, and Minnesota, held our first-ever gala to raise additional funds for our during-school STEM enrichment program, and revised our modules to ensure our lessons align with Next Generation Science Standards. Now, as we near the end of the 2017-18 academic year, we're preparing for a fun and impactful summer of science! Read on for more.

Thank You!

We're delighted to share our [2016-17 Annual Report](#) with all of you!

We invite you to explore the many accomplishments we achieved together last year, from opening an office in Minnesota to piloting a new teacher professional development program.

Join our Team

Are you passionate about science? Do you want to help kids learn to love it too?

Our First-Ever Gala

Our Inaugural Gala: Blast Off was a huge success! We're deeply grateful for our inaugural gala sponsors, including New England BioLabs, PJT Partners, Fish & Richardson, and The Bachelder Group at Morgan Stanley. Thank you for your support!

We were thrilled to host 150 guests at Akamai Technologies in Cambridge, MA. Guests in attendance watched science come alive as our scientists conducted fun experiments, and teachers and students in our during-school science enrichment program shared powerful stories from the classroom.

Our guests also participated in a live auction and silent auction with unique items and experiences donated by some of the coolest people and organizations across the nation. Thank you all for your commitment to STEM education!

A Summer of Science

We are hiring for instructors to join our team for the fall 2018! Positions available in California, Massachusetts and Minnesota!

If you have an undergraduate degree in a STEM (science, technology, engineering and math) field and have, or be pursuing, an advanced degree in a STEM or Education field or have equivalent industry experience, apply to become a Science from Scientists instructor!

[Learn more and apply here.](#)

Join us this summer for our thrilling Science of Forensics program for middle schoolers, hosted at Babson College in Wellesley, MA!

Over our week-long program, students will learn the science and techniques behind forensic investigations and put their skills to the test to solve a mock-crime. Experiments include ink chromatography, DNA extraction, fingerprinting, cryptography, microscopic analysis, and more!

Registration is open and seats are still available for this exciting summer science program! [Visit our Eventbrite page to register.](#)
